| **PROCESS & DOCUMENTATION** | Automation Checks \| Technical Documentation \| Vendor Coordination \| Process Support |

## PROFESSIONAL EXPERIENCE

### Operations & Systems Specialist

*On Call Restaurant Accounting (OCRA), Denver, CO | Dec 2018 – Aug 2025*

- Supported 42 internal users at an accounting firm serving 300+ restaurants, including multi-location groups; supported the firm's main contractor separately through one primary contact.
- Administered Microsoft 365 accounts, licensing, Entra ID, Exchange Online, SharePoint, permissions, and identity and access across the employee lifecycle.
- Created Teams workspaces, populated standardized files, maintained the Front Office team, published announcements, and provided technical support.
- Investigated Exchange Online mail-flow, phishing, and spam issues using message tracing, mailbox controls, and Barracuda policies; coordinated corrective action.
- Implemented Microsoft 365 MFA broadly across the organization, managed individual exceptions, and resolved enrollment and access issues across Android, iOS, Windows, and macOS.
- Coordinated onboarding and offboarding across accounts, devices, licenses, permissions, and access removal.
- Selected, configured, and deployed Windows computers, monitors, printers, and peripherals.
- Coordinated Verticom cloud phone setup with management and the vendor, including contact setup, user training, routing, extensions, and troubleshooting.
- Ran Restaurant365 bots and automation checks across approximately 75 groups and worked with a remote contract programmer when checks required review or correction.
- Documented core systems and trained a successor for the company transition.

## EARLIER TECHNICAL EXPERIENCE

### Genius Admin

*Apple Fifth Avenue Flagship Store, New York, NY | Oct 2007 – Oct 2008*

- Promoted from Apple Specialist to Genius Admin at Apple's Fifth Avenue flagship store.
- Coordinated repair workflow, customer scheduling, service documentation, inventory management, and parts ordering using Apple's internal systems.
- Ordered, received, and reconciled repair parts while managing limited inventory space.

### Live Streaming Operations

*The FeedRoom, New York / New Jersey | 2008–2009*

- Monitored live ESPN360 streams within a final quality-control workflow, identified transmission, encoding, and content failures, and escalated incidents.
- Supported overnight and international live operations, routing and transmission observation, event coordination, and handoffs.

## ADDITIONAL TECHNICAL EXPERIENCE

- Built, upgraded, and repaired PC hardware, including storage, memory, expansion cards, and peripheral components.
- Configured home and small-business networks and services, including routers, Wi-Fi, static IP addressing, port forwarding, DNS, domains, web and email hosting, and FTP/SFTP.
- Installed Linux on repurposed hardware and used command-line and compilation tools for legacy web-publishing software.
- Created reusable step-by-step technical documentation and supported Windows and macOS systems across user and small-business environments.

## EDUCATION

### Bachelor of Science in Technical Communication

*Minor in Anthropology*
Metropolitan State University of Denver | 2019

## ADDITIONAL TOOLS

Barracuda Email Protection | Exchange Admin Center | Microsoft 365 Admin Center | Microsoft Entra ID | Microsoft Office | Outlook | Printers & Office Hardware | Remote Support & Conferencing Tools | Restaurant365 | SharePoint | Teams Admin Center | Windows | macOS
