JAY ROHRS

OPERATIONS & SYSTEMS SPECIALIST | MICROSOFT 365

TECHNICAL SUPPORT & BUSINESS SYSTEMS

Denver, CO

PROFESSIONAL SUMMARY

Microsoft 365 and technical support specialist serving an accounting firm since 2018. Combines identity administration, email security and user support with AI-assisted reporting and local AI workflows.

42 internal users · ~75 automation groups | OCRA serves 215+ restaurants across 17 states

CORE SKILLS

CLOUD & IDENTITY	Microsoft 365, Entra ID, Exchange Online, Teams, SharePoint and MFA
SYSTEMS & SECURITY	Restaurant365, OData, Barracuda and mail-flow investigation
DEVICE SUPPORT	Windows, macOS, Android, iOS, device deployment and remote support
OPERATIONS & AI	Documentation, training, vendor coordination, Excel and Ollama
ADMIN CONSOLES	Microsoft 365, Exchange and Teams admin centers; Barracuda Email Protection

PROFESSIONAL EXPERIENCE

On Call Restaurant Accounting (OCRA) | Denver, CO | Dec 2018–Present

Operations & Systems Specialist — Contract

2025–Present

- Support Microsoft 365 users across Teams, Outlook, account access and mailbox issues.
- Traced a mail-flow failure to a sender-side forwarding restriction and identified the required administrator action.
- Develop AI-assisted Restaurant365 reporting using read-only OData feeds, freshness checks and exception flags.

Operations & Systems Specialist — Full-time

Dec 2018–Aug 2025

- Supported 42 internal users across account access, hardware, applications and remote troubleshooting.
- Administered Microsoft 365, Entra ID and Exchange Online; managed accounts, licensing and access permissions.
- Investigated phishing and mail flow using Exchange message tracing and Barracuda; managed MFA enrollment.
- Deployed devices, coordinated onboarding and offboarding, trained users and documented systems for a successor.
- Monitored Restaurant365 automation across ~75 groups; referred technical failures to the contract programmer.
- Coordinated cloud-phone planning, testing, call routing and user training with management and the vendor.

SYSTEMS & AI PROJECTS

jBase — AI-Assisted Application Development

Independent project | 2026–Present

- Design and direct AI-assisted development of an application for research, document review and client workflows.
- Integrate local AI models with Ollama across Windows and Linux; diagnose task-routing and runtime failures.
- Build document-review workflows that compare revisions, preserve originals and require approval before replacement.

TECHNICAL SUPPORT & OPERATIONS

AV & Livestream Support

First Unitarian Society of Denver | Mar 2025–Present | Volunteer; selected memorial services paid

- Support Wirecast, ProPresenter, Zoom and PTZ cameras for two simultaneous streams; resolve live AV issues.

HR Data & Operations Support

Dairy Farmers of America via OfficeTeam / Robert Half | Henderson, CO | Feb 2014–c. Aug 2015

- Analyzed workforce and demographic data in Excel for EEO tracking; prepared training materials and driver packets.

Live Streaming Operations

The FeedRoom | New York / New Jersey | 2008–2009

- Monitored ESPN360 streams for overnight and international events; escalated encoding and transmission issues.

Genius Admin

Apple Fifth Avenue | New York, NY | Oct 2007–Oct 2008

- Promoted from Specialist to Genius Admin; coordinated repairs, parts, inventory and customer handoffs.

Imaging Manager

Mountain States Imaging | Englewood, CO | c. 1996–2000

- Managed three offices and 15+ staff; opened a new branch and oversaw document imaging and quality control.

Independent Technical Support | Earlier project work

- Built and repaired PCs; configured routers and Wi-Fi; supported Windows, macOS and web/email hosting.

EDUCATION

Bachelor of Science in Technical Communications

Minor in Anthropology

Metropolitan State University of Denver | Awarded December 2019
